
Identity

There are over 7.6 billion people on our planet and our planet is only 1 of many planets in our solar system. That makes each one of us pretty small.

Sometimes we can feel like we're too small to be noticed, but Christians believe that God thinks each one of us is important and he loves each of us.

If you would like to, take a small piece of clay and mould it into a model of yourself. Put your model on your planet with the rest of your classmates and think or pray about how valued you all are.
